EDUCATION

Cost and Management Accounting - ICMAI (Formerly ICWAI)

December 2022 - December 2025

- Exemption in Financial Accounting and Cost Accounting subjects in CMA Intermediate.
- Exemption in Cost & Management Audit and Strategic Performance Management & Business Valuation subjects in CMA Final.

Bachelor's of Engineering (Computer Engineering) - Pune University

August 2018 - August 2022

- CGPA 9.16
- Coursework: Data Structures and Algorithms, DBMS (including SQL), Computer Networks, Advanced Computing, Operating Systems

EXPERIENCE

Audit Assistant (Risk Advisory)

Kirtane & Pandit LLP Chartered Accountants

July 2024 - October 2025

- Built a risk-prioritised ITGC audit framework for large, multi-system IT environments (ERP + satellite systems), reducing testing effort by ~40% while maintaining focus on business-critical controls.
- Developed Python analytics to process large datasets (100k+ records) and identify material process and compliance gaps.
- Created a lightweight ETL pipeline to clean and structure raw data (e.g., quarterly biometric logs of 500+ employees), enabling analysis by non-technical audit teams.
- Designed clear data visualisations and process maps to link control gaps to operational risk and support management discussions.
- Presented key risks and mitigation 3options to senior management (CEO/CFO/COO) of listed enterprises, focusing on prioritisation and practical next steps.
- Participated in review of related-party transactions for entities within a large Indian conglomerate (maximum turnover ~₹1 Lakh Cr), identifying disclosure and compliance gaps.
- Contributed to the development and implementation of a structured statutory compliance review framework covering labour, corporate and economic regulations.

TRAININGS & CERTIFICATES

McKinsey Forward Program

McKinsey.Org

ONGOING

Microsoft Office Intermediate and SAP-FICO Poweruser Program

Institute of Cost and Management Accountants of India

January 2023

SKILLS

- Data extraction and analytics (Excel/Python), automation
- Internal Audits, ITGC Audits, IFC testing
- Data visualizations, executive presentations, stakeholder engagement
- Software engineering and development

PROJECTS

Indian stock market prediction - *Final year major project*

August 2021 - May 2022

Led a research project analyzing NSE stock data using Machine Learning to predict 1-day ahead prices (average percent error 1.6%). Applied data-driven approaches to identify patterns and anomalies, demonstrating analytical rigor.

CO-CURRICULAR ACTIVITIES

Industry 4.0 and Techno-financial Expertise - *Article writing*

July 2024

Published an article in CMA Vidyarthi e-bulletin on emerging technologies and techno-financial expertise.

Google's Developer Students Club - *Member, Flutter Expert/Android Expert*

September 2020 - July 2022

Conducted Android study sessions, mentored peers and managed social media initiatives for the developer community.

E-Yantra Robotics Competition IIT-B - *Team Member*

October 2020 - December 2020

Developed ball balancing platform controller using advanced computer vision for real-time tracking of the ball within maze, find the shortest path to the destination and navigation thereon by applying analytical problem solving and teamwork.
